

The following live ETDM ArcIMS map services are available for use in desktop applications like ArcMap:

1. EtatReview: This map service includes all geometry types (point, line, polygon) associated with ETDM projects in a currently in an active review.
2. Reviewed: This map service includes all geometry types (point, line, polygon) associated with ETDM projects that have completed an 'ETAT Review'.
3. ETDM\_NonDraft: This map service is a combines the two services and allows you to see projects in an active review and those which have already completed a review.

In order to access these services from ArcMap:

1. Open ArcMap
2. From the 'Add Data' menu, select 'GIS Servers'
3. Choose 'Add ArcIMS Server'
4. In the 'URL of server' box, enter: <http://mappub.fla-etat.org>
5. Select 'Just the following service(s)' and 'Get List'
6. Check off any or all of the above mentioned services, and hit 'OK'.

7. mappub.fla-etat.org will now appear in your 'Add Data' list, select it and choose your service(s).
