

Overview

The Biennial Efficient Transportation Decision Making (ETDM) Performance Survey within the new Environmental Screening Tool (EST) covers a 2-year period allowing various users to rate and record their experience in the ETDM process and interactions throughout the entire survey reporting period, and not just for a specific project.

This survey intends to characterize your District's participation in the ETDM process from 01/01/2018 to 12/31/2019. Please update the survey to ensure the ratings you select capture your District's experience in the ETDM Process in its entirety, throughout the new survey reporting period, and not just for a specific project.

This survey is an important feedback tool and we hope you will take the time to explain your selections and provide thoughtful responses. If things are great, tell us what's great. If things can be improved, tell us your recommendations.

Please note that a rating of 'Poor,' 'Strongly Disagree,' and 'Not Beneficial' requires an explanation. In your response, please identify the issue and provide recommendations to resolve it moving forward.

To assist in the development of your survey responses, we have provided a link to the ETAT Feedback Report. This report will allow you to quickly see an agency's performance, as well as obtain a list of all their project effect comments submitted during the reporting period [01/01/2018 to 12/31/2019]. Press the ETAT Feedback Report button below, select an agency, and press create report. You can save incremental drafts of your survey responses, but once you finalize it, the survey will no longer be editable.

We look forward to your responses.
